

**The new Kask HP Plus is a high-tech helmet specifically designed for professional rescue and work-at-heights applications.** An ultra-lightweight, compact and feature-rich helmet, the new HP Plus is certified to Australian Standards AS/NZS 1801:1997 Occupational Protective Helmets.

**Amazing comfort**

The KASK HP Plus features 10 air intake valves to keep you cool. The advanced shape of the inner shell promotes natural air flow while the padded lining wicks moisture away from your head, is removable, washable and treated with Polygiene® technology to inhibit bacteria growth.

**Durable safety**

Made in Italy, the helmet's stylish design and superior quality is evident. The helmet's high density ABS plastic shell withstands significant impact. Protective aluminium anti-intrusion grills perform as a one-way membrane to deflect debris, water and chemicals from entering through the air intake valves. The four-point chin strap is designed to decrease the risk of helmet loss in the event of an impact or fall.

**Versatile convenience**

The KASK HP Plus features a stowable internal head harness which allows multiple helmets to be stacked without damage. The helmet's quick dial system enables fast, efficient size adjustment from 51 cm to 62 cm. A red ring on the chin strap enables the helmet to be attached your harness. The helmet is equipped with a lamp holder system which is compatible with all current styles of headlamp elastic bands. Optional accessories include full face visors, half visors with clear, tinted or mirrored finishes and bayonet style ear defenders.
